

CAMPBELLTOWN HOSPITAL REDEVELOPMENT

Get involved in the future of Campbelltown Hospital

We are committed to working with the local community throughout the project, from the design of the new building and planning the new services, to opening and launching new wards and services.

We have made a commitment to work with the local community to get feedback and input on how we deliver the new buildings and services. We will work with patients and their carers, clinical and non-clinical staff, community representatives, local Council and non-Government organisations as well as local teaching and education partners.

To be part of the redevelopment and to see first-hand how the project is being run, express your interest to become a community representative by completing an application form on the Campbelltown Hospital Redevelopment website.

It's an exciting time for the local community with the NSW Government investing \$632 million for stage 2 of the Campbelltown Hospital redevelopment.

The redevelopment vision is 'Leading Macarthur to Better Health'.

We will do this by working closely with the local community to deliver enhanced services that meet the local community's healthcare needs.

What will the project deliver?

Planning has commenced for the \$632 million upgrade of Campbelltown Hospital.

A new clinical services building will be delivered and existing buildings will be refurbished. More clinical services and medical specialties will be available at the Hospital which means the local community will have access to healthcare closer to home. The redevelopment will improve patient flow, provide better access to the Hospital, food and retail outlets and increased job opportunities.

A multi-storey carpark will also be delivered separate to the \$632 million upgrade.

Meeting the healthcare needs of the growing community

The redevelopment funding has come at an important time because the area is experiencing unprecedented population growth.

- By 2031 there will be 58% more people (a growth rate more than double that for the rest of NSW)
- By 2045 there will be 111,560 more houses, and an additional 311,000 people within the South West growth corridor
- An increase of 58% of children aged between 0-14 years by 2031
- People aged 70+ years to increase by 144% by 2031

To meet the healthcare needs of our growing community the redevelopment will focus on health services for children and women, mental health services and older persons healthcare. The Hospital will also provide care for more complex illnesses, diseases and trauma.

Who will benefit from this project?

- Every inpatient, outpatient, consumer, volunteer, staff member and visitor will experience a more seamless healthcare experience
- Children and their families from Wollondilly, Camden, Campbelltown and the wider South Western Sydney community will have access to expanded children's healthcare services
- Staff will have the opportunity to work in a modern and cutting-edge facility
- The local economy will benefit from more local jobs and investment

Key features include:

- New clinical services building with modern wards and patient facilities
- New women's health services including birthing suites and maternity ward
- New nuclear medicine and dental services
- State-of-the-art operating theatres and intensive care unit
- Bigger emergency department with more treatment spaces
- Increased medical and surgical children's services
- Modern mental health units that are centrally located
- Increased access to cancer, outpatient and ambulatory care services
- Upgraded medical imaging equipment
