

## What's happening on the hill?

Construction of a link road, which will run up over the hill connecting Carpark P2 with the internal road near the new multi-storey carpark, is well underway. This involves significant excavation into the hillside - the above photo shows progress of excavation works and the beginnings of a new road.

Over the last month there has been a lot of action at the front of the hospital with reconfiguration of Carpark P1 (outside Emergency). A temporary loop road is being constructed prior to the establishment of the main construction zone which will sit right outside the main entrance to the hospital. On completion of works in P1 the bus stop will move near the helipad and a covered walkway will maintain access between the main entrance, the Emergency Department and the bus stop.

## Sneak Peek

*Inside our new multi-storey carpark*

**Next Pop-Up Information Stall**  
Campbelltown Mall - Friday 31 May  
11am to 2pm outside Woolworths

**If you are not subscribed already and would like to receive our monthly newsletter please email:**

**[SWSLHD-CampbelltownHospitalRedevelopment@health.nsw.gov.au](mailto:SWSLHD-CampbelltownHospitalRedevelopment@health.nsw.gov.au)**

**We thank you for your patience as we build your new hospital.**

## Where should I park?

There are many changes around the hospital campus as construction and refurbishment works are carried out. Remember to allow plenty of time to find parking, and to find your way around the hospital. Please follow signage and directions given by traffic controllers and staff.

Timed street parking is also available on Parkside Crescent

For the safety of staff, patients and visitors, please adhere to the 10 km/hr speed limit across the campus.

**Best for Outpatient Clinics, Building D and Cancer Therapy - Carpark P8 & P9**  
Enter via Parkside Crescent or Appin Road

**Best for Emergency, Buildings A/B/C, Admissions and Day Surgery - Carparks P1 & P2**  
Enter via roundabout off Therry Road

**Be sure to allow yourself extra time to find parking before your appointment.**

## Graffiti? Hieroglyphics??

### Did you know?

The first known example of hieroglyphic writing in ancient Egypt was discovered on bone and ivory tags, pottery vessels and clay seal impressions discovered in a pre-dynastic tomb in Abydos.

This is not the case at Campbelltown Hospital where strange markings resembling hieroglyphics applied using tools of the modern graffiti artist have been popping up all over the place.

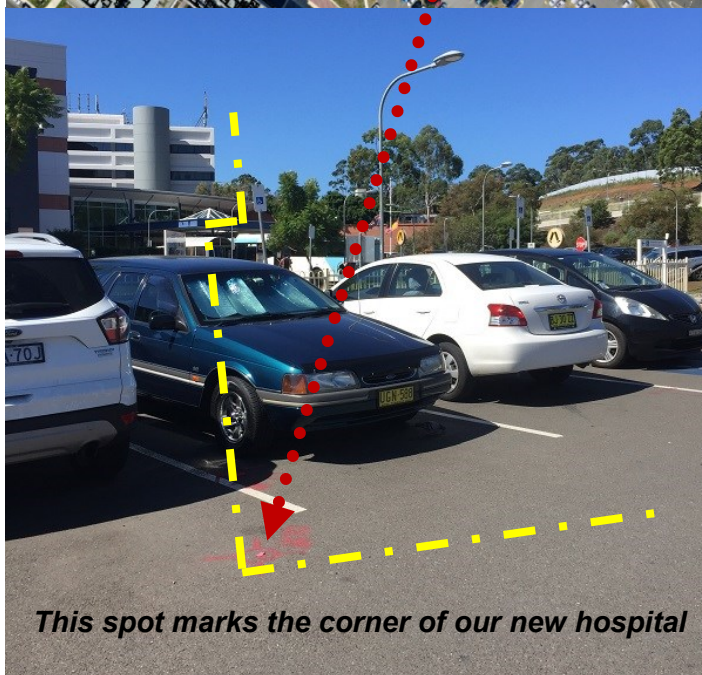

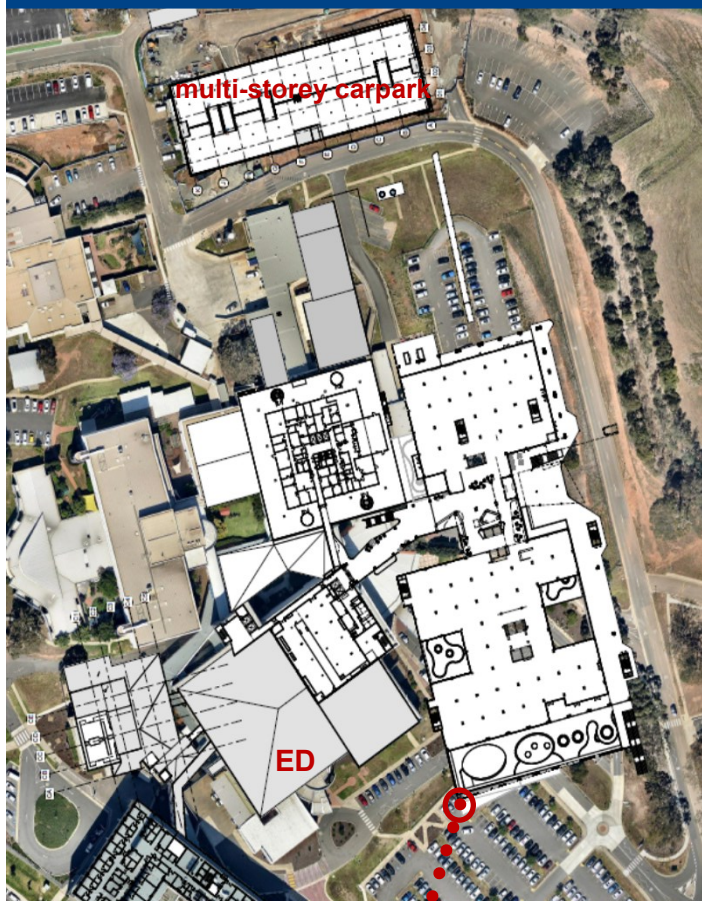

Spray painted marks are used in identification of underground services and also to mark out survey points showing the location of planned construction.

We have located the exact spot where the corner of our new building will be built in the P1 Carpark.

Looking from this point back towards the existing hospital main entrance it is exciting to imagine where the new hospital will be built and just how big it will be.

Looking at the images on right - the top image shows the footprint of existing and new buildings and below you can see the red X in Carpark P1 which marks the corner of the new hospital building. Dashed in yellow is the approximate footprint of the building as will be seen from this point.

## X marks the spot
