

Your new hospital

It is an exciting time for the Macarthur community with \$632 million invested locally to deliver world-class health care to the south west. Our vision is 'Leading Macarthur to Better Health'. We will do this by providing high quality care that meets the health needs of the community.

We will be working with the local community to deliver stage 2 of the Campbelltown Hospital redevelopment. New clinical services building will be delivered and existing buildings will be refurbished.

More clinical services and medical specialities will be available which means the local community will have access to healthcare closer to home. The redevelopment will also improve patient flow, better access to the Hospital, food and retail outlets, a multi-storey carpark and more job opportunities.

Artists Impression

Key features of the redevelopment

- New clinical services building with modern wards and patient facilities
- New women's health services including birthing suites and maternity ward
- New nuclear medicine and dental services
- State-of-the-art operating theatres and intensive care unit
- Bigger emergency department with more treatment spaces
- Increased medical and surgical children services
- Modern mental health units that are centrally located
- Increased access to outpatient and ambulatory care services
- Upgraded medical imaging equipment.

Meet the Campbelltown Hospital redevelopment team

The Campbelltown Hospital redevelopment team are working closely with Health Infrastructure (HI) to deliver state 2 of the hospital redevelopment projects.

Amy Coghill—Change Manager

Clare Searson—Communications and Engagement Officer

Loretta Andersen—Project Director

Jodie Wilson—Administration Officer

Where is the project up to?

The project is currently in the design phase. We have recently completed the concept design process which shows the relationships between the clinical functions, services, building and other facilities. We are now in schematic design and this involves looking at the layout of departments, how rooms and services will relate to each other and how services 'flow' between new and existing infrastructure.

If you would like to know more visit the Health Infrastructure website: <https://www.hinfra.health.nsw.gov.au/how-to-build-a-hospital/overview>

Get involved in the future of Campbelltown Hospital

We are committed to work with the local community throughout the project, from the design of the new building and planning the new services, to opening and launching new wards and services.

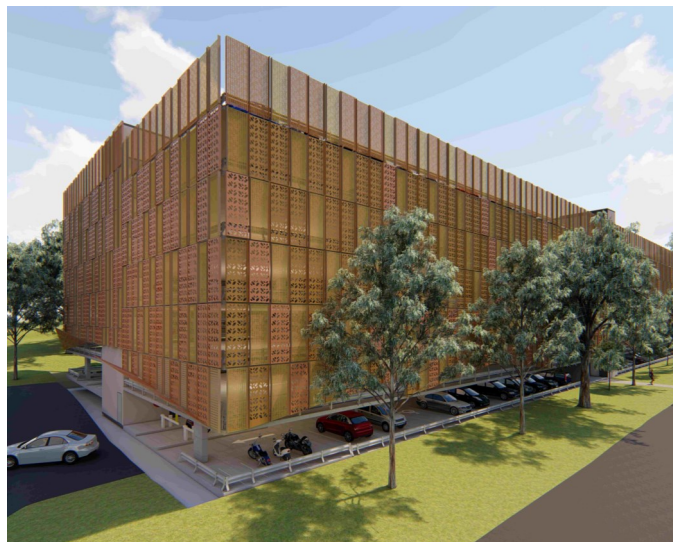

We have made a commitment to work with the local community to get feedback and input on how we deliver the new buildings and services. We will work with patients and their carers, clinical and non-clinical staff, community representatives, local council and non-government organisations as well as local teaching and education partners.

To be part of the redevelopment and to see first-hand how the project is being run, express your interest to become a community representative by completing an application form on the Campbelltown Hospital redevelopment website.

To express your interest, complete the application form: <https://www.swslhd.health.nsw.gov.au/ccq/redevelopment.html>

Multi-storey car park

The new multi-storey car park will address current and future demand for parking at Campbelltown Hospital.

The current plans include building a new multi-storey car park with seven levels and approximately 800 spaces.

The multi-storey car park will be located on the south eastern side of the hospital near Appin Road.

“Having children who utilised special needs services, I am excited that these services and more will be offered in Campbelltown”

Charleene Mundine
