

From Wednesday 18 May, the pedestrian travel path to the Emergency Department from Parkside Crescent and the P2 car park will change.

Pedestrian access from the P2 car park to the current Emergency Department entrance will be via the route marked below, turning right towards the new clinical services building and following the signs into the concourse area. Pedestrians will then take the lift or adjacent stairs down towards the future Emergency Department and follow the pathway.

There will be an increase in construction vehicles near this area while works are finalised on the new building. A traffic control plan is in place to keep everyone safe and assist with navigating around the works.

SUMMARY OF IMPACTS

- Changed pedestrian pathways for safe travel
- Increase of construction vehicles on internal road
- Temporary changes to traffic conditions
