

HOSPITAL ACCESS CHANGES

INFORMATION SHEET | JUNE 2022

The new clinical services building at Campbelltown Hospital will open in stages from early June to late August 2022.

The new building will include the main hospital entrance and reception, admissions, cashier and Emergency Department (ED), along with a range of enhanced and expanded hospital services.

A new public car park (P3) and hospital campus road will enable easy access to the new main entrance, supported by the relocation of patient drop-off and bus services. Accessible parking spaces are available in all car parks.

There will be changes to the way patients access some services as they move into the new building. Patients are encouraged to read appointment letters carefully for information about the best parking, drop-off and entry point.

From 29 June, the new ED will be located on Level 0 of the new building. The dedicated ED parking and patient drop-off zone will be maintained within the upgraded P1 car park, which is best accessed via Central Road. The P2 car park will also provide easy access to the ED and new hospital building.

For assistance navigating the hospital during the transition period, visit the Main Reception desk located in the main entrance foyer on Level 2 of the new building. We appreciate your patience as we make your exciting new hospital building operational.

KEY UPCOMING CHANGES

- New main entrance and drop-off opens 6 June
- Main reception and cashier relocate to new main entrance foyer from 6 June
- New P3 car park opens 6 June
- Admissions relocates to new main entrance foyer from 8 June
