

CAMPUS ROAD WORKS

INFORMATION SHEET | APRIL 2022

From 5pm Tuesday 26 April to mid-May 2022*, a section of the hospital's internal road network will be closed to allow completion of the future main entrance to the new clinical services building.

These works will change access routes to the P2 visitor car park and hospital Link Road, with access via Therry Road or Appin Road only. There will be no impact to Emergency Department access as a result of these works.

If you are entering the campus from the Parkside Crescent roundabout, please follow the detour signs to access parking via the Therry Road entrance. If you have entered the campus on Central Road, please take the fourth exit at the roundabout and follow the signs for the Therry Road detour.

Works will occur 24 hours a day Monday to Friday and until 6pm Saturdays. You may notice some noise, dust, vibration and an increase in construction vehicles at varying times within and around the work area.

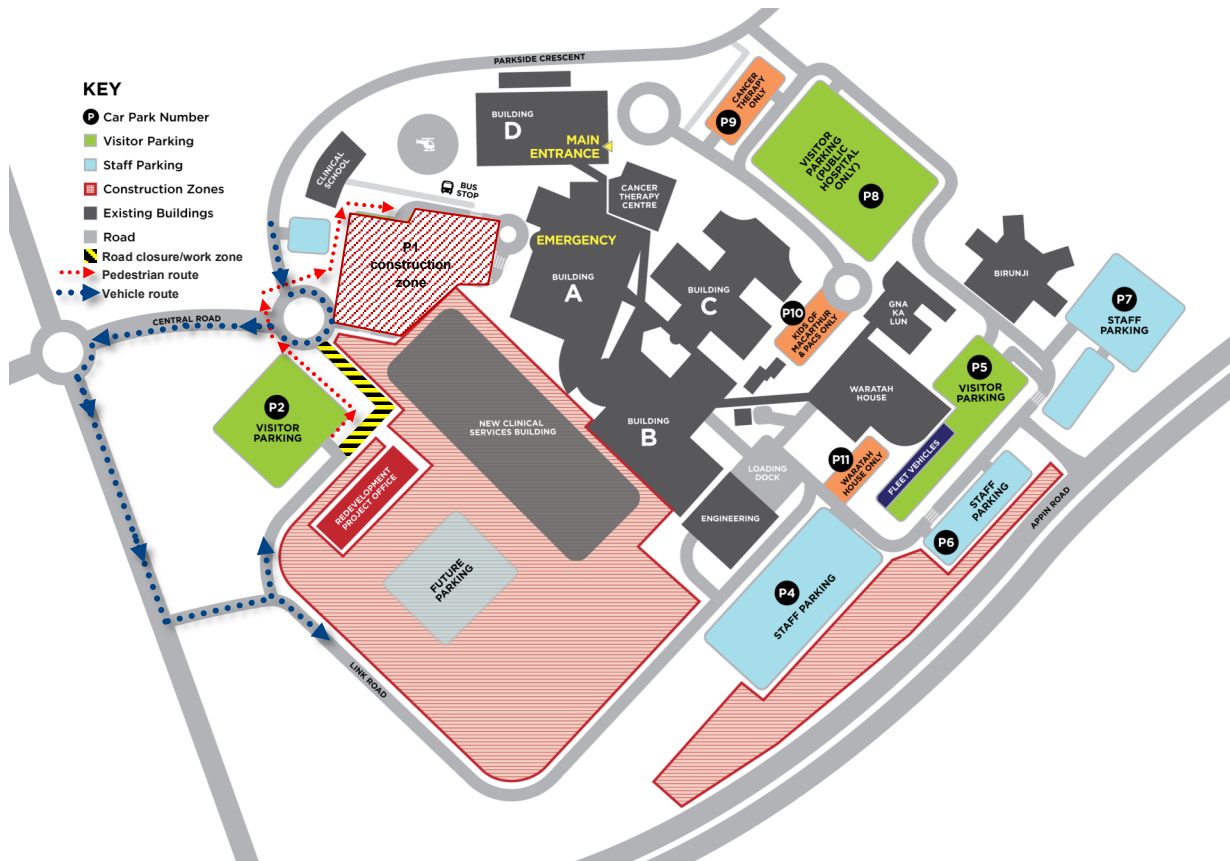

A traffic control plan will be in place, including road work signs and traffic controllers to help motorists and pedestrians navigate the area. Please follow the temporary signage and instructions of traffic controllers to ensure safe travel during these works.

We apologise for any inconvenience while we build your new hospital.

SUMMARY OF IMPACTS DURING THESE WORKS

- P2 car park access via Therry Road entrance
- P4 staff car park access via Therry Road or Appin Road entrances
- Temporary changes to traffic conditions
- Some noise, dust and vibration impacts
- Changed pedestrian pathways for safe travel

** Please note that timing of works may be subject to change*
